TECHNICAL SKILLS

Expertise: JavaScript, ES6, React.js, Firebase, Tailwind, Html5, Css5

Comfortable: Next.js, Rest API, Chrome Dev Tool, Bootstrap, Mongoose

Familiar: Node.js, Express.js, MongoDB, JWT, Axios, React Query

Tools: Git & GitHub, npm, VS Code, Netlify, Vercel

PROJECTS

TravelNest

[Live / Client / Server](#)

Technology - React, Node, Express, Mongoose, JWT, Tailwind

Explore a wide variety of rooms, from luxury hotels to charming bed and breakfasts. With a user-friendly interface, secure bookings, and insightful reviews, I make finding and booking your ideal stay a breeze.

- **User-Friendly Interface:** My intuitive and user-friendly interface allows you to effortlessly browse available rooms, filter by preference, and find the perfect accommodation for your trip.
- **Secure Bookings:** Rest assured knowing your bookings are secure and reliable. I prioritize your privacy and work with trusted partners to ensure a seamless booking process.
- **Filtering:** The platform allows seamless room selection by offering intuitive filters for adults, children, and room quantity.
- **Authentication:** Authentication is implemented with Node.js and JSON Web Token.

Snap Academy

[Live / Client / Server](#)

Technology - React, Node, Express, MongoDB, JWT, Firebase, Tailwind

A photography website that offers various courses related to photography. Users can select multiple courses and purchase. This website features one kind of e-commerce website.

- **Authentication:** Authentication is implemented with Firebase. If a user forgets their password the user can reset their password.
- **Filtering:** The platform allows seamless course selection by offering intuitive filters for price range, categories, ascending, and descending order. And user can search specific courses from the search box.
- **User-Friendly Interface:** Fully responsive UI on any type of devices like mobile, tablet, laptop, and desktop.
- **Reviews:** Users can review on Snap Academy. Which will be added to the home page.
- **Dashboard:** The user and admin can see their own dashboard.

Sweet Bakery

[Live / Client / Server](#)

Technology - Reactjs, Expressjs, MongoDB, Firebase, Tailwind

Chefs showcase their ingredients via the website, where a user can see the chef's total items and top item ingredients are shown in detail. By looking at the chef reviews, the user can understand which chef is perfect for him. This was my first project with React.js. Basically from this project, I learned how to work with API.

- **User Profile and Preferences:** Implement a section for users to set preferences, such as preferred cuisines or dietary restrictions, which can be used to personalize their recipe recommendations on the homepage.
- **Responsive Design and Accessibility:** This website is responsive for mobile, laptop, and desktop only.

EDUCATION

Government Titumir College

2016 - 2023

BBA(Hon's) in Finance

PROFESSIONAL COURSES

Programming Hero

2023

Complete Web Development
